

I'm not a robot!

That's weird. At Thalmor's embassy, I was sneaking in happy, getting right under people's noses, all the usual "Skyrim Sneaking A® broken as things". So while I was at the embassy, I noticed that the guards were identifying me easily. The guards inside the embassy saw me at the moment I was in their line of sight. The guards on their way to the interrogation chambers saw me clearly through the snow³. Then I went through the "without being caught and managed to get away with detection easily while tracking people, so I didn't think much more of it. Now I've played a little bit further in the game, and now I'm absolutely certain that Sneak Mode isn't doing more to diminish my visibility. I did some tests in pA® the edge of the visibility/hostility intervals of the enemy characters, seeing them change their position as they will see me, shouting insults to me to make me go away, that kind of thing, and it becomes clear that my detection distance while sneaking up is exactly the same as my detection distance when not sneaking. I've read about an animating flaw that can hold players in the pom mode and that sitting in a chair can knock them out of an animation bug. This is not happening as far as I know. Sneak It definitely enveloping, the "hidden" icon appears, the eye open, if I am seen, my walking speed changes, all this and, if I get a long shooting to hit, I will still receive my riot multiplier. What I can't do doesn't really get less visible when you sneak out. I tried to clear the state in the water, sitting and using all kinds of interacting objects, but without data. The world of stealth is now lost to me. Is this a known error? Does anyone know a way to clear this status? Otherwise, I'm going to have to go back to an older manual economy and that's going to waste six hours of I'd rather not have to repeat it. EDIT: Actually, thinking about the events at Thalmor's embassy, I suspect I might have overflown my sneak sneak eht⁴ ta tuoba gniknlis si nroblaM deman sAAeemphleD fo tcatnac detsurt a teenet of era uoy⁵ yssabmE romlah⁶ eht gntartlfni no nlp eht tuo remmeh dna ereth reh htiv pu teenet of si nlp eht. krad eht n Edalb A Reffa Dooowrevir ROF FFO Stes Enihbeld in Noos The Smigeb Tseuq sichtnemesirevda we drink citomolpu⁷ -stseuq yrrols niam eht FO 1 For ena pleh t'neod thin taht dmif l'l'i taht tcepusi i Emoh tegi i nehw niaga sqnith the l'l'i tub won krow of ff M'ircses dn hlaests ed edam Tali nevig.
